INDUSTRIAL SERVICES

"Built on Trust, Driven by Excellence."

CAPABILITY STATEMENT 2026

ACCESS | RIGGING | SCAFFOLDING | INDUSTRIAL SUPPORT

Built on Trust, Driven by Excellence.

SUMMIT INDUSTRIAL SERVICES
ABN 41 693 462 421
Karratha Industrial Estate | Servicing the Greater Pilbara Region

COMPANY PROFILE

Summit Industrial Services is a Pilbara-based specialist access and rigging provider delivering scaffolding, rigging, inspection, engineering support and integrated industrial services across demanding operational environments.

With more than 50 years of combined industry experience, our team supports maintenance, shutdown, construction, marine and project works with a practical focus on safety, reliability, responsiveness and efficient execution.

Based in the Karratha Industrial Estate and servicing the greater Pilbara region, Summit is positioned to support clients across energy, resources and minerals, utilities, renewables, rail, marine and construction.

CORE CAPABILITIES

- Tube & Fit scaffolding systems
- AT-PAC Ringlock scaffolding systems
- Scaffold erection, modification and dismantling
- Scaffolding equipment hire and sales
- Crane and mechanical rigging
- Rigging inspections and lifting support
- Scaffold design and engineering coordination
- Working-at-heights equipment inspection and tagging
- Logistics and materials management
- Shutdown, maintenance and project support
- High Risk Work Licence and competency verification support
- Integrated access and rigging solutions

SCAFFOLDING & ACCESS SOLUTIONS

Summit Industrial Services provides a diverse range of high-quality scaffolding and access solutions, from traditional Tube & Fit systems through to modern modular options including the AT-PAC Ringlock System.

Our experienced team provides safe and efficient installation, modification, dismantling and ongoing support for projects of varying size and complexity. We tailor our approach to site conditions, operational priorities and project schedules, supported by coordinated logistics, materials management and equipment supply.

SCAFFOLD DESIGN & ENGINEERING

We provide tailored scaffold design and engineering coordination to meet project-specific access requirements. Working with suitably qualified professionals, Summit develops practical solutions for complex structures, challenging work environments and specialised access requirements.

Where engineered design is required, detailed drawings, plans and supporting documentation can be developed and verified by suitably qualified engineers in accordance with applicable Australian Standards, regulatory obligations and site requirements.

SAFETY & COMPLIANCE

Safety is fundamental to every aspect of our operations. We recognise the inherent risks associated with working at heights, scaffolding, rigging and complex access activities, and apply a risk-based approach to protecting our people, clients and assets.

Our teams combine planning, competent personnel, fit-for-purpose equipment and disciplined work methods. Working-at-heights activities are managed in accordance with applicable WHS legislation, codes of practice, client procedures and relevant Australian Standards, including applicable requirements of the AS/NZS 1891 series.

- Pre-start planning, SWMS, JHAs and task-specific risk assessments
- High Risk Work Licence, competency and VOC verification
- Scaffold inspection, handover and tagging processes
- Working-at-heights equipment inspection and tagging
- Fall-arrest, lifeline and retrieval/rescue provisions where required
- Engineering and design verification where required
- Toolbox meetings, consultation and ongoing safety communication
- Continuous improvement through reporting, review and learning

EVERY PERSON GOES HOME SAFELY, EVERY DAY.

Summit Industrial Services is working towards ISO accreditation as part of our commitment to strengthening safety, quality and continuous improvement systems.

INTEGRATED DELIVERY

Successful project delivery requires more than skilled personnel and equipment. It requires effective planning, responsive coordination and the ability to adapt quickly to changing site conditions and operational priorities.

Our integrated service model brings together scaffolding, access, rigging, inspection, engineering support, logistics and materials management. Through Just-In-Time sequencing and coordinated mobilisation, we aim to ensure the right equipment, materials and resources are available when and where they are required, helping reduce congestion, downtime and unnecessary material movements.

- Project planning and mobilisation
- Scaffold and access design coordination
- Rigging and lifting support
- Just-In-Time material and equipment sequencing
- Logistics and materials management
- Workforce and equipment coordination
- Shutdown, maintenance and project execution
- Inspection, tagging and compliance support
- Demobilisation and materials reconciliation

INDUSTRIES WE SERVE

ENERGY
Access and rigging support for energy infrastructure, maintenance, construction and project activities.

UTILITIES
Practical access solutions supporting essential infrastructure, upgrades, maintenance and construction.

RAIL
Specialised access and rigging solutions supporting rail infrastructure, maintenance, upgrades and projects.

RESOURCES & MINERALS
Specialist services supporting mining and mineral processing operations, shutdowns, maintenance and projects.

RENEWABLES
Scaffolding, access and rigging support for renewable energy and emerging energy projects.

MARINE & CONSTRUCTION
Support for ports, marine infrastructure and industrial construction environments.

KEY PERSONNEL

Our management and support team provides the operational coordination, planning and commercial support required to deliver safe, responsive and reliable services across Summit Industrial Services projects.

JASON MATAKATEA | Managing Director

As Founder and Managing Director, Jason leads the strategic direction and overall management of Summit Industrial Services. He works closely with clients and the leadership team to guide business growth, operational performance and the delivery of safe, reliable access and rigging solutions across the Pilbara and wider Western Australian market.
Jason is a dual licensed rigger scaffolder with 25+ years experience.
KEY AREAS: Leadership | Business Strategy | Client Relationships | Operations | Project Delivery

REBECCA NEUMANN | Director & Accounts

Rebecca is a Director of Summit Industrial Services and oversees the company's accounts and financial administration functions. Working closely with the operational and management teams, she supports accounts management, supplier and client coordination, commercial administration and the broader development of the business. Rebecca spent many years working closely with indigenous families & communities across Karratha, Roebourne and the wider Pilbara. Rebecca has a degree in social science and a masters in learning and teaching higher education.
KEY AREAS: Directorship | Accounts & Financial Administration | Commercial Support | Business Administration | Client & Supplier Coordination

TRAVIS KURU | North West Operations Manager

Travis oversees operational delivery across the North West, supporting the safe and efficient execution of scaffolding, access, rigging, shutdown, maintenance and project works. Working closely with clients, site teams and management, he supports workforce coordination, mobilisation, project planning and day-to-day execution.
Travis is a dual licensed rigger scaffolder with 10+ years experience
KEY AREAS: Operations Management | Project Delivery | Workforce Coordination | Client Liaison | Safety Leadership

NIKKI SHARPE | Planning & Scheduling

Nikki supports Summit Industrial Services' planning and scheduling functions, coordinating people, equipment, materials and project requirements to support efficient and reliable service delivery. Her role includes forward planning, resource scheduling, mobilisation and coordination of changing operational priorities.
KEY AREAS: Planning & Scheduling | Resource Coordination | Mobilisation | Project Support | Materials Coordination

WHY SUMMIT

- Pilbara-based and locally responsive
- More than 50 years of combined industry experience
- Integrated scaffolding, access and rigging capability
- Experience across shutdown, maintenance, marine and project environments
- Safety-focused planning and execution
- Responsive mobilisation and practical problem solving
- Engineering and design support for complex access requirements
- Inspection, tagging, logistics and materials management capability

OUR COMMITMENT

Summit Industrial Services is committed to building long-term client relationships through dependable service, transparent communication and consistently high standards of workmanship. We aim to become a trusted delivery partner by understanding our clients' operational requirements and providing safe, practical solutions that support productivity and project performance.

ONE TEAM. INTEGRATED SOLUTIONS.
